The article examines the models of terminologisation including the initial meaning (the meaning of the word of general use), the meaning of the term and the common semantic feature on the basis of which the transaction between two units is realized. On the material from natural sciences are presented examples for third degree of terminologisation, when the word of general use and the term designate different concepts without any essential similarity between them and connection between them is completely abstract, produced from human thinking.
Keywords: terminology, language of general use, degrees of terminologisation
