WORD-BUILDING OF THE INITIAL ABBREVIATIONS (I)

(Summary)

The survey consists of two parts: names of people that were formed of the initial abbreviations, as well as structural representation of derivatives formed of the initial abbreviations. In the first part we analyze the derivatives such as *седесар*, *кейфоровец* etc., proving that the producing basis is not the grapheme combination (КФОР, СДС), but the so-called lexoid (for example [*кейфор*], [*седесе*]). The second part, on the grounds of the word formation and morpheme analysis that was performed in advance, the nouns, pronouns and verbs that are directly or indirectly motivated by the lexoids, are organized in word-formation nests, as each derivative is related to its particular and summarizing scheme.

Keywords: initial abbreviation, grapheme combination, lexoid, word-building
